

# Top 5 Document Challenges & Remedies Via Auto Document Generation App

## While obtaining data, errors, and misplacements can be expected.

Remedy: With an intelligent next-level auto doc-gen application, all the needed data is automatically obtained from multiple Salesforce objects.

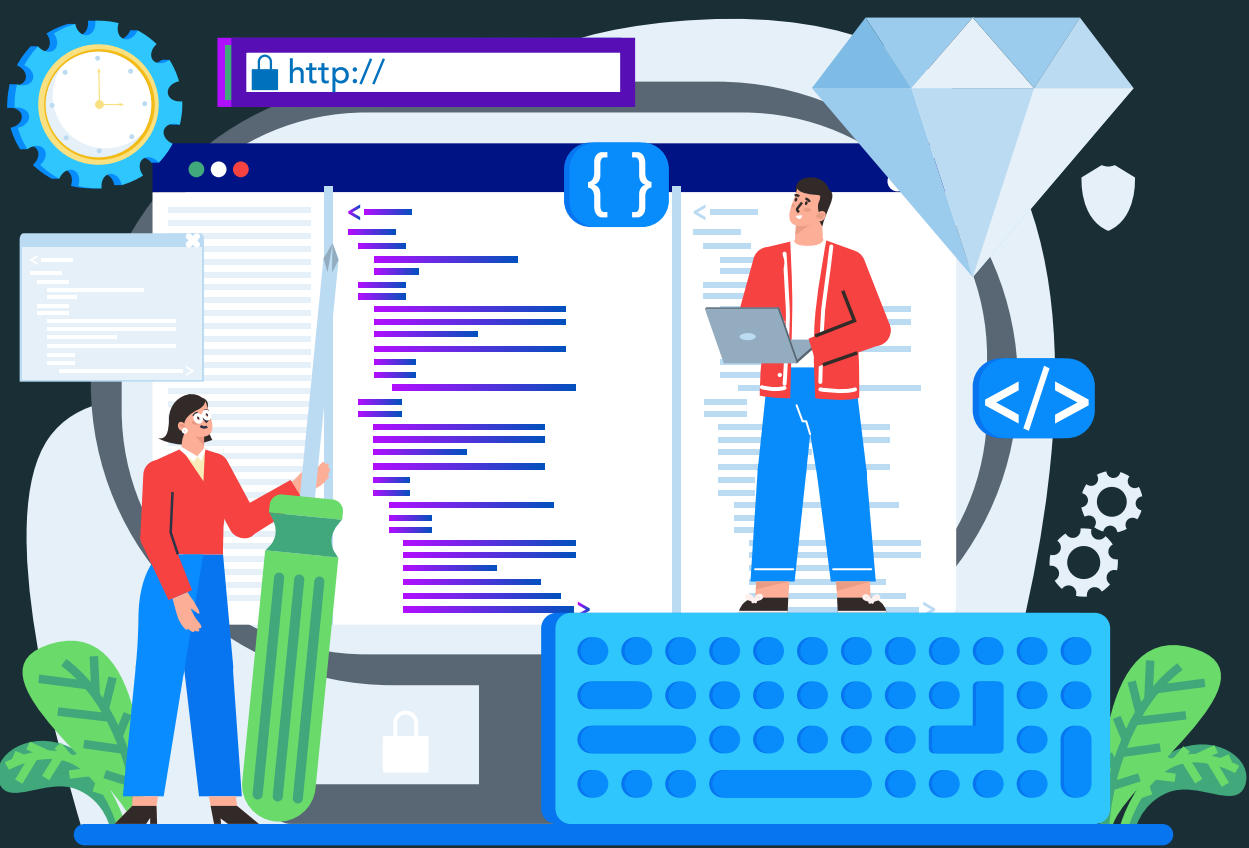

## The state of perfect precision cannot be achieved

Remedy: When everything is automated, there is an out-and-out assurance of zero errors. Automated document generation eliminates the manually created error and paves the way to accuracy.

## The perpetual process of proofreading and editing.

Remedy: When there are zero errors there is no rationale to proofread or edit your documents. Embracing automatic document generation will unburden you from going through the documents 'n' times.

## Document security is uncertain

Remedy: If you are generating your documents within Salesforce, then there will be no chance of exposure of data and documents to other external sources. Your documents will be secure inside the CRM until and unless you desire to move them otherwise.

## Each document favors a different template

Remedy: With an auto document generation app for Salesforce, the user can choose the desired template for each of his requirements. Also, the user can upload his custom template to the app and get the automation done. There is no need to put any effort into creating the template from scratch.
